

How to Make a Pom-Pom Using a Pom-Pom Maker

Open the pom-pom maker and wrap yarn around one side. Close and repeat on other side.

When both sides are closed, using very sharp scissors, cut the yarn down the middle on both sides.

Slip a piece of yarn between the two halves and tie securely, pull the yarn as tight as you can without breaking it and tie in a double knot. Lift the arms up and away from the maker, repeat on the other side. Pull maker apart.
